

# Declared in conformity and here's the evidence!

Choose furniture in conformity with current standards and regulations. Backed by tests, the **NF Bureau Sécurité Confortique** [French Standards for the Safety and Comfort of Office Furniture] system provides objective evidence that the product meets all requirements and takes account of the criteria relevant to this specific use in terms of:

> **Safety > Solidity > Durability > Conformity to standards**

This gives you the additional certainty that the manufacturer can guarantee a constant level of quality for all furniture with the **NF Bureau Sécurité Confortique** label.

## Office workstations

- > **Dimensions:** suitable for the different uses.
- > **Safety of use:** no burrs, edges or sharp points, no open profiles at extremities, no areas where pinching or shearing could occur during movement. Stable during use with or without load. Stable with drawers open and full.
- > **Solidity under stress:** fatigue under vertical stress with load (400 N, 10,000 cycles).
- > **Behaviour during falls**
- > **Frame rigidity**
- > **Mechanical resistance of worktops** (standard or high resistance)
- > **Electrical safety**

## Pedestals

- > **Dimensions:** suitable for the different uses.
- > **User safety:** stable with drawers open.
- > **Solidity when loaded**
- > **Rigidity**
- > **Durability:** drawers with runners or sliders (load 0.7kg/dm<sup>3</sup> – 50,000 cycles). Sudden opening and closing. Rolling resistance on mobile pedestals.
